MOSAIC OPTIONS

FOR WATERLINE PORCELAIN TILES

Why Mosaic Pools?

Our mosaic pools have become significantly popular over the past 20 years. We are among the only companies worldwide that offer fiberglass pools with waterline tiles. Recently, we have introduced our Mosaic line of fiberglass swimming pools to the North American market, including Canada and the United States. Our mosaic pools have all the advantages of rectangular pools. They can be a great addition to the majority of the backyards due to variations in size and lack of curves and custom shapes. Mosaic pools are also an ideal option when comparing fiberglass pools with concrete and vinyl pools due to the exponential growth in the popularity of flat bottom pools and the smoothness of a fiberglass gel coat in comparison to concrete and liners. In addition to all the similar advantages to rectangular pools, mosaic pools also have a full-width bench seating area on the opposite side of the entry and exit steps, making it suitable for relaxation, family gatherings and parties. Our mosaic fiberglass pools also come with 6 different models and colours of waterline porcelain tiles. Our mosaic fiberglass pools are ideal if you are looking for a luxurious pool with a classy, modern, and catchy look. The international pool industry's top experts design all of our mosaic pool models to wow anyone, meeting all ICC standards. Our differentiating factors are high quality and smooth gel coat, full-width bench seatings, porcelain waterline tiles, and availability of the most popular sizes to serve customers with a backyard of any size.

POOLS & LANDSCAPING

What is a Fiberglass Swimming Pool?

The fiberglass pool shells consist of one-piece fiberglass construction shop-formed over a mold using a spray-up system. The material is a minimum of 1/8-inch thick (3.175mm), fiberglass-reinforced plastic (FPR), composed of gel coat-based NPG isophthalic polyester resin and fiberglass roving. The fiberglass pool surface finish is a gel coat and fiberglass roving coat. We also offer a mosaic line with a surface finish of gel coat with tiles along the rim of the pool.

Fiberglass is used in some of the most advanced industries in the world, including multi-million-dollar yachts, aeroplanes and helicopters, exotic cars, military equipment, water tanks, and thousands of other products. Fiberglass is also the ideal material for swimming pools, bathtubs, sinks, and hot tubs.
